

GET YOUR SUPPLIES TOGETHER.....

Take medication out of the refrigerator approximately 2-3 hours before dose time.

- Prefilled Saline syringes (2)
- Prefilled Heparin syringe (1)
- Alcohol pads & disinfection caps if used
- Medication to be infused

SALINE FLUSH

Flush line with prefilled saline syringe before infusion.

ADMINISTER MEDS

Administer the medication.

SALINE FLUSH

Flush line with prefilled saline syringe after medication infusion.

HEPARIN FLUSH

Flush line with prefilled heparin syringe to prevent clotting.

Contact your nurse if you experience any of the following with your IV:

- » Pain at site
- » Redness at site
- » Swelling or hardness around site
- » Heat at site
- » Leaking or drainage around site or dressing

REMEMBER!
Wash your hands thoroughly with antibacterial soap before you begin.

Flush the line not in use with normal saline and heparin once daily.
